

# Consumption and Treatment Services (CTS) Closure Facts: Harm Reduction

**On March 31, 2025, Guelph's Consumption and Treatment Services (CTS) will close.**

The site will begin transitioning to a Homelessness and Addiction Recovery Treatment (HART) Hub. Starting April 1, 2025, the site will no longer offer supervised consumption services.

## We are still in a drug toxicity crisis.

The unregulated drug supply is unpredictable and toxic. People who use substances are at risk of drug poisoning.

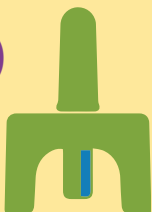

## There are steps you can take to keep yourself and people you know safer.

Here are some local resources.

## Carry naloxone (and learn how to use it)

Naloxone (also known as Narcan) is a medication that can temporarily reverse the effects of an opioid overdose. It is free and available at WDG Public Health, pharmacies, and other locations [on this map](#).

## Never use alone

Use substances with others when possible, or call the [National Overdose Response Service](#):

**1-888-688-NORS (6677)**

## Reach out for support

In crisis or looking for support? [Here 24/7](#) will work with you to understand your needs and get you connected.

## Visit Stay Sharp

Stay Sharp is dedicated to reducing the transmission of blood-borne infections and minimizing risks associated with substance use. Stay Sharp will not be part of the HART Hub but will remain open at a new location. For more information visit [guelphchc.ca/staysharp](http://guelphchc.ca/staysharp)

## Start low, go slow

For example, with any new substance, start with 1/3 of a normal dose.

## Test substances before using

You can use the drug checking machine at 176 Wyndham St, or test strips. Learn more on the [WDGS website](#).

Thank you for helping to keep our community safe.
